

Course Content

Artificial Intelligence with python

Module 1: Introduction to Artificial Intelligence

Introduction to Python Programming

Module 2: Python for Data Science

Module 3: Data Wrangling Techniques

Module 4: Introduction to Neural Networks

Introduction to Keras Framework

Module 5: Introduction to Convolutional Neural Networks

Module 6: Introduction to Recurrent Neural Networks

Module 7: Introduction to Natural Language Processing

Module 8: IBM Cloud Services

Module 9: Introduction to Auto AI

Module 10: Introduction to discovery

Module 11: Introduction to different modes of Deployments

Module 12: Introduction to IBM Python Flask APP
