

Course Content

Machine Learning with python

Module-1: Introduction to Machine Learning

Environment Setup of anaconda Introduction to python programming

Module-2: Python for Data Science

Module-3: Data Wrangling Techniques

Module-4: Introduction to Supervised Machine Learning Introduction to Regression Algorithms

Module-5: Introduction to Classification algorithms

Module-6: Unsupervised Learning

Module-7: Introduction to different modes of Deployments

Module-8: Introduction to IBM Cloud Services

Module-9: Introduction to Auto AI
